

Blended Learning Journey
Physical: Section B
The Living World

I can describe a small-scale ecosystem in the UK

I can explain the interdependence of components within ecosystems

I can explain the effect of atmospheric circulation on global ecosystem distribution

I can describe the characteristics of a tropical rainforest

I can explain the distinctive characteristics of vegetation in tropical rainforests

I can explain the distinctive characteristics of animals in tropical rainforests

I can describe the value of the tropical rainforests

I can describe the effects of deforestation on tropical rainforests

I can discuss the causes of deforestation

I can discuss the changing rates of deforestation

I can discuss how the rainforest can be managed sustainably

I can discuss the causes of deforestation

I can discuss how the rainforest can be managed sustainably

I can explain the distinctive characteristics of plants in the hot deserts

I can describe the effects of development on hot deserts

I can explain the causes of desertification

I can explain the causes of desertification

I can describe the characteristics of a hot desert

I can explain the distinctive characteristics of animals in the hot deserts

I can explain threats to areas near hot deserts

I can discuss the effectiveness of a range of strategies to reduce the risk of desertification
